PÜTZ
GROUP

More innovative, more creative, quicker ...

That's our philosophy.

We are always on the lookout for creative solutions and innovative technologies to meet your requirements even quicker.

*More innovative,
more creative, quicker ...*

More innovative, more creative, quicker ...

Our core expertise

is engineering and manufacturing complete client-specific machinery and components. We are the industry specialists in mechanical engineering of plastics extrusion, robotics, automation, assembly and battery production fields. We are constantly expanding our fields of business and capacities with future demand in mind.

*Stefan Pütz,
Managing Director*

Fair and open cooperation

with our clients is a basic prerequisite for us. Our customers must benefit from and enjoy our products and services. We offer top quality, on-time delivery and flexibility, backed up by our highly professional, motivated and results-oriented staff.

Company history

1988

1991

1997

1988

Founded as a software and commissioning planning office

1991

Began manufacturing control cabinets

1997

Moved to the company's new offices on the banks of the Saar River.
400 m² office space and 300 m² production space

1998

Began making complete systems including mechanical equipment,
robotics and conveying equipment

2000

Move to the new final assembly shop with 1,100 m²

2003

Began manufacturing specialised machinery

2004

Founding of the PMC Machinery Solutions s.r.o. company in Bratislava, Slovakia

2007

Took over and further operation of Bellaform GmbH, Gau-Algesheim (Mainz)

2009

Opened our Limburg branch

2010

Took over and further operation of Sampas GmbH, Remshalden-Grunbach (Stuttgart)

1998

2000

2003

2004

These are the people responsible for development, construction,
testing, manufacture, installation, sales and maintenance.
Their analytical and strategic approach is the basis of our success.

Individual, customised system solutions in the following fields

- Robotics
- Assembly
- Welding
- Control and operation engineering
- Special machinery manufacture
- Battery production machinery

Machines and systems for the automotive and supplier industry

Pütz Prozessautomatisierung GmbH

Head office Saarburg

Am Saarufer 8
54439 Saarburg
GERMANY
Phone: +49 6581 9299-0
Fax: +49 6581 9299-29

Battery production machinery

Starter battery machinery:

Production:

- Automatic box hole punching machinery
- Automatic short circuit testing machinery
- Automatic leak testing (pressure testing) machinery
- Automatic set fixing machinery (hot glue)

Finishing:

- Depalletising robot
- Automatic acid filling machinery
- Automatic levelling machinery
- Automatic screwing machinery
- Automatic degassing cap placement machinery
- Washing plant
- Automatic high current loading testing machinery
- Automatic high voltage leakage testing machinery
- Automatic pole brushing machinery
- Automatic pole lubrication machinery
- Automatic marking machinery
- Automatic labelling machinery
- Palletising robot
- Automatic acid decanting machinery
- Automatic acid level checking machinery
- Automatic sealing strip installation machinery
- Automatic cover blowing machinery
- Automatic anti-static spray machinery
- Automatic picking and packing machinery

Traction and industrial battery machinery:

Production:

- Automatic plate punching and polishing machinery
- Automatic plate stacker
- Automatic sealing ring insertion machinery
- Automatic leakage testing machinery
- Automatic marking machinery

Finishing:

- Automatic acid filling machinery
- Manual acid filling equipment
- Automatic gel filling machinery
- Manual gel filling equipment
- Automatic vacuum acid filling machinery
- Automatic vacuum gel filling machinery

Bellaform GmbH

Marie-Curie-Straße 14

55435 Gau-Algesheim

GERMANY

Phone: +49 6725 91925-0

Fax: +49 6725 91925-200

info@bellaform.com

www.bellaform.com

**Development and assembly
of plastics processing plant
and machinery**

- Extrusion plants
- Inline thermal shaping equipment
- Shear roll mixing systems

As a system house Bellaform develops complete ranges of production machinery with components optimally harmonised and mature automation. We offer complex plant with all peripheral equipment as well as individual machines, i.e. all the individual devices in our range, all components and all the additional devices and accessories.

We specialise in supplying convincing solutions precisely tailored to your individual production requirements with consistent top build quality. We have all the know-how and expertise needed.

Sampas GmbH

Stuttgarter Straße 85
73630 Remshalden-Grünbach
GERMANY
Phone: +49 7151 604033-0
Fax: +49 7151 604033-300
info@sampas.de
www.sampas.de

**Planning and implementing
system solutions for mechanical
engineering plant and industry**

- Automation
- Rationalisation
- Quality improvement

Sampas supplies turnkey robotics systems and automation plant solutions that are trend-setters. Each individual project is supervised from the idea via optimal implementation to achievement of all the goals set.

Our robotics and system solutions include:

- Handling
- Milling
- Grinding
- Polishing
- Deburring

Our charter

1. ___ hours in service, carpe diem: be creative!
2. Peace and freedom are important goods. It is worth taking responsibility for them.
3. Ethics, morals and values are essential for sustainable, economic success.
4. Trust should be established and extended rapidly internally between employees and externally with customers and suppliers on the basis of ethics and values.
5. Success needs analysis and strategy, which must be at the start of all efficient activities.
6. Our customers must benefit from and enjoy our products and services: quality, on-time delivery and flexibility are essential.
7. We encourage our suppliers to work with us on the basis of and in the spirit of this charter.
8. Our noble aim is to give our employees tasks that they work through with joy and satisfaction; we want to thus awaken vitality in them so they can develop more, all negative pressure must be avoided. To err is human; in contrast analysing this in depth and working towards appropriate, fundamental changes is the duty of all of our employees. We communicate with high quality; the quantity of the language used appears to be counter-productive. Polarisation creates clarity and increases the pressure for the decision; none of those involved need to undertake superfluous efforts. We are economical up to the point of being mean, thus protecting resources and the environment, as well as creating profitability and stability.
9. The duty to maintain the confidentiality of operational material from use by third parties applies to employees, suppliers and customers. All data and information must be treated as highly sensitive. Only the essential data and information may be provided to third parties.
10. 5% of our pre-tax profit goes to charities that support children. Here too the minimum-maximum principle is important.

Quality
+ On-time Delivery
+ Communication
= Customer Satisfaction
= Win + Win
